TREASURY DEPARTMENT,
OFFICE OF COMPTROLLER OF THE CURRENCY.

WASHINGTON, September 9th, 1874.
WHEREAS: By satisfactory evidence presented to the undersigned, it has been made to appear that "The Centerville National Bank of Thurnau," in the village of Centerville, in the County of Gallia, and State of Ohio, has been duly organized under and according to the requirements of the Act of Congress entitled "An Act to provide a National Currency, secured by a pledge of United States bonds, and to provide for the circulation and redemption thereof," approved June 3, 1864, and has complied with all the provisions of said Act required to be complied with before commencing the business of Banking under said Act.

Now, therefore, I, JOHN JAY KNOX, Comptroller of the Currency, do hereby certify that "The Centerville National Bank of Thurnau," in the village of Centerville, in the County of Gallia, and State of Ohio, is authorized to commence the business of Banking under the Act aforesaid.

In testimony whereof, witness my hand and seal of office this 9th day of September, 1874.
JOHN JAY KNOX,
Comptroller of the Currency.

Who Knows? or, Home Questions.

Who knows where pins and needles go, Where all the buttons stray?

Who knows where all the pennies go, That somehow get away?

Who knows how all the china breaks, That wasn't touched at all?

How baby gets so black a bruise, Yet never gets a fall?

Who knows whence all the fashions come, And where they disappear?

Why one brief month should make a night, Of what was "such a dear?"

Who knows how little life can swell To such prodigious size?

Who knows, indeed, what's going on Beneath his very eyes?

Who knows just where her husband goes, When "business" keeps him out?

Who knows when best to wear a smile, And when to wear a pout?

Who knows the time to face the fact, That she's no longer young?

Who knows how little life can swell To such prodigious size?

Who knows how best to speak her mind, And how to hold her tongue?

Who knows the most convenient day To bring a friend to dine?

Who knows the half of what he spends On clubs, cigars, and wine?

Who knows one hour cannot last, A woman half her life?

Who knows the woman is the same, When sweet-heart turns to wife?

Who knows why all the pretty girls Are often late to go?

How all the ugly women wed, Who never have a beau?

Why small men fancy wives so large, And large men fancy small?

Who knows, in fact, how half the world Was ever matched at all?

Who knows how far to trust a friend, How far to keep a secret?

Just when to speak a kindly word, And when a sturdy No?

Who knows—the grim old Greek sage, Socrates, said, "I know not."

The wisest man, from all the world, Is he who knows himself.

FRANKLIN'S VISIT TO HIS MOTHER.

Dr. Benjamin Franklin, after the

decease of his father, returned to Boston, in order to pay his respects to his mother, who had resided in that city. He had been absent some years, and at that period of life when the greatest and most rapid alteration is made in the human appearance—at the time when the querulous voice of the strapping assumes the commanding tone of the adult, and the smiling features of the youth are succeeded by the strong lines of manhood. The doctor was sensible that his mother could not know him, except by that instinct which is believed can cause a mother's heart to beat violently in the presence of a child, and point the maternal eye with quick and sudden glance to a beloved son.

To discover the existence of this instinct by actual experience, Franklin resolved to introduce himself as a stranger to his mother, and to watch narrowly himself as observing in which she should discover her son, and then to determine with the true precision of the philosopher, whether that discovery was the effect of that instinct of affection—intuitive love—that innate attachment, which is conjectured to cement relatives of the same blood, and which, by according the passions of parent and child, like a well-tuned viol, would at each touch cause them to vibrate in unison, and at once evince that they were but different chords of the same instrument.

On a sullen, chilly day, in the month of January, in the afternoon, the doctor rapped at his mother's door, and asked to speak with Mrs. Franklin. He found the old lady knitting before the parlor fire—introducing himself as observing in which she should discover her son, and then to determine with the true precision of the philosopher, whether that discovery was the effect of that instinct of affection—intuitive love—that innate attachment, which is conjectured to cement relatives of the same blood, and which, by according the passions of parent and child, like a well-tuned viol, would at each touch cause them to vibrate in unison, and at once evince that they were but different chords of the same instrument.
